

Bug Reports

Restaurant Management System

Team 10 - Software Testing Project 2026

Document Version	1.0
Date	May 31, 2026
Prepared By	Muhammad Faraz Ansari, Ashhal Aamir, Muhammad Ibrahim
Total Bugs Reported	31 (grouped into 19 unique incidents)
Project	Restaurant Management System

Team Members:

- Muhammad Faraz Ansari (29201) - Reservation Module
- Ashhal Aamir (29114) - Food Ordering Module
- Muhammad Ibrahim (29079) - Login, Event & Admin Modules

Last Updated: May 31, 2026

Contents

1	Reservation Module Bugs	3
2	Ordering Module Bugs	8
3	Login, Event & Admin Module Bugs	13
4	Summary of Bugs	19

1 Reservation Module Bugs

Bug Report INC-RES-001: Account Lock Not Working After Failed Attempts

Incident ID	INC-RES-001
Test Case ID	TC-RES-005
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Reservation / Authentication
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: After 3 or more failed login attempts, the account does not lock. The SRS requires account lock for 15 minutes after three consecutive failed login attempts.

Steps to Reproduce:

1. Navigate to login page
2. Enter correct email but wrong secret key (1st attempt)
3. Enter wrong secret key again (2nd attempt)
4. Enter wrong secret key again (3rd attempt)
5. Enter correct secret key on 4th attempt

Expected Result: Account locks after 3 failed attempts. Correct credentials on 4th attempt should show "Account locked" message.

Actual Result: No error message shown. Login simply fails each time. Correct credentials on 4th attempt work successfully.

Note: The application uses a "secret key" instead of a traditional password, but the locking mechanism should still function regardless of credential type.

Bug Report INC-RES-002: Past Date Search Allowed

Incident ID	INC-RES-002
Test Case ID	TC-RES-007
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Reservation
Severity	Minor
Priority	Medium
Status	Open (No fix available from developers)

Description: Searching for reservations on past dates redirects to available seats page instead of showing an error message.

Steps to Reproduce:

1. Log in as customer
2. Navigate to reservation page
3. Select a past date (yesterday)
4. Select time and party size
5. Click Search button

Expected Result: Error message: "Cannot book past dates" or no results returned.

Actual Result: System redirects to available seats page as if searching for a future date.

Bug Report INC-RES-003: Party Size Exceeding Capacity Still Shows Tables

Incident ID	INC-RES-003
Test Case ID	TC-RES-008
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Reservation
Severity	Minor
Priority	Medium
Status	Open (No fix available from developers)

Description: When searching for a party size larger than any table capacity (15 people when max table capacity is 8-10), the system still shows available tables instead of rejecting the request.

Steps to Reproduce:

1. Log in as customer
2. Navigate to reservation page
3. Select future date and time
4. Enter party size: 15
5. Click Search button

Expected Result: Message: "No tables available for this party size" or "Please contact restaurant for large parties".

Actual Result: System redirects to tables page showing all available tables (2-seat, 4-seat, 8-seat, 10-seat capacities).

Bug Report INC-RES-004: No Automatic Table Assignment

Incident ID	INC-RES-004
Test Case IDs	TC-RES-011, TC-RES-012, TC-RES-013
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Reservation
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: The system does not automatically assign tables based on party size. Users must manually select a table from the list of available tables.

Steps to Reproduce:

1. Log in as customer
2. Search for availability for party of 2
3. View available tables
4. Complete booking

Expected Result: System automatically assigns a 2-seat table for party of 2, 4-seat table for party of 4, etc.

Actual Result: All available tables are shown. User must manually select which table to book.

Note: This contradicts SRS Section 7.2.2 which states "Automatically assign tables based on party size and capacity."

Bug Report INC-RES-005: No Pending Approval Status for Reservations

Incident ID	INC-RES-005
Test Case ID	TC-RES-014
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Reservation
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: Reservations are booked immediately without requiring staff approval. The SRS requires "Pending Approval" status requiring staff confirmation.

Steps to Reproduce:

1. Log in as customer
2. Search and select available time slot
3. Complete reservation form
4. Submit reservation
5. Check reservation status

Expected Result: Reservation created with status = "Pending Approval"

Actual Result: Reservation booked immediately. No approval workflow exists for reservations.

Bug Report INC-RES-006: No Staff Approval Workflow for Reservations

Incident ID	INC-RES-006
Test Case IDs	TC-RES-016, TC-RES-017
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Reservation
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: There is no staff approval queue for reservations. Staff cannot approve or reject reservation requests.

Steps to Reproduce:

1. Log in as staff/admin
2. Navigate to approval queue
3. Look for reservation approval options

Expected Result: Staff can view pending reservations and approve/reject them.

Actual Result: No reservation approval functionality exists. Only event approvals are available.

Bug Report INC-RES-007: No Upcoming Reservations View / Cancel Functionality

Incident ID	INC-RES-007
Test Case IDs	TC-RES-018, TC-RES-019, TC-RES-020, TC-RES-021
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Reservation
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: Customers cannot view their upcoming reservations or cancel existing reservations. There is no "My Reservations" or "Upcoming Reservations" tab in the customer dashboard.

Steps to Reproduce:

1. Log in as customer
2. Navigate to customer dashboard
3. Look for "My Reservations" or "Upcoming Reservations" option

Expected Result: Customers can view all upcoming reservations with dates, times, and statuses, and cancel reservations (with 24+ hour notice).

Actual Result: No such tab exists. Customers cannot view or cancel their reservations after booking.

Bug Report INC-RES-008: No Session Timeout

Incident ID	INC-RES-008
Test Case ID	TC-RES-022
Date Found	31 May 2026
Tester	Muhammad Faraz Ansari
Module	Security / Authentication
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: User session does not timeout after 15 minutes of inactivity as required by SRS Section 8.3.3.

Steps to Reproduce:

1. Log in to system
2. Do nothing for 16 minutes
3. Try to access a protected page

Expected Result: Session expired. User redirected to login page.

Actual Result: User remains logged in indefinitely. Session does not timeout.

2 Ordering Module Bugs

Bug Report INC-ORD-001: No Item Details Page

Incident ID	INC-ORD-001
Test Case ID	TC-ORD-002
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering
Severity	Minor
Priority	Low
Status	Open (No fix available from developers)

Description: Clicking on menu items does not show detailed view with description, price breakdown, or image. Only picture, name, and "Add to Cart" button are visible.

Steps to Reproduce:

1. Navigate to menu page
2. Click on any menu item

3. Observe what happens

Expected Result: Detailed page showing name, description, price, and image (if any).

Actual Result: No details page. Clicking does nothing (other than the Add to Cart button, which adds to cart directly).

Bug Report INC-ORD-002: Delivery/Takeaway Form Issues

Incident ID	INC-ORD-002
Test Case IDs	TC-ORD-008, TC-ORD-009
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering
Severity	Minor
Priority	Medium
Status	Open (No fix available from developers)

Description: - Delivery: Address form has single field instead of separate street, city, zip code fields - Takeaway: No pickup time selection field available

Steps to Reproduce:

1. Add items to cart
2. Proceed to checkout
3. Select "Delivery" or "Takeaway" as order type

Expected Result: - Delivery: Separate fields for street, city, zip code - Takeaway: Pickup time selection (earliest available time)

Actual Result: - Delivery: Single field for "Delivery Address" - Takeaway: No pickup time selection field

Bug Report INC-ORD-003: Invalid Delivery Address Accepted

Incident ID	INC-ORD-003
Test Case ID	TC-ORD-011
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: System accepts any delivery address, even those outside configured service zones. No validation occurs.

Steps to Reproduce:

1. Select delivery as order type
2. Enter address outside city limits (e.g., "999 Remote Road, Far Town")
3. Submit address

Expected Result: Error message: "Delivery not available to this address"

Actual Result: Address accepted. Proceeds to payment receipt generation.

Bug Report INC-ORD-004: No Separate Order Confirmation Message

Incident ID	INC-ORD-004
Test Case ID	TC-ORD-015
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering
Severity	Minor
Priority	Low
Status	Open (No fix available from developers)

Description: No special confirmation message or email appears after order placement. Only the order confirmation screen at the end of the ordering process is shown.

Steps to Reproduce:

1. Place valid order
2. Check for confirmation message

Expected Result: Special confirmation message displayed or email sent (simulated).

Actual Result: No separate confirmation message. Only the order confirmation screen that is already part of the checkout flow.

Bug Report INC-ORD-005: Cannot Check Order Status

Incident ID	INC-ORD-005
Test Case IDs	TC-ORD-016
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: Customers cannot check the status of their orders. No order tracking functionality exists.

Steps to Reproduce:

1. Place an order
2. Try to check order status

Expected Result: Order status visible (Received → Preparing → Ready → Completed)

Actual Result: No way for customers to check order status. Only staff/admin can see orders.

Bug Report INC-ORD-006: No Order Filtering by Status

Incident ID	INC-ORD-006
Test Case ID	TC-ORD-021
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering (Staff)
Severity	Minor
Priority	Low
Status	Open (No fix available from developers)

Description: Staff cannot filter orders by status. All orders are shown in order received (latest to oldest).

Steps to Reproduce:

1. Staff logs in
2. Navigates to order queue
3. Look for filter options

Expected Result: Filter by status (Received, Preparing, Ready, Completed) available.

Actual Result: No filter functionality. All orders displayed together.

Bug Report INC-ORD-007: No Order Search by Number

Incident ID	INC-ORD-007
Test Case ID	TC-ORD-022
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering (Staff)
Severity	Minor
Priority	Low
Status	Open (No fix available from developers)

Description: Staff cannot search for orders by order number. No search bar exists in the order queue.

Steps to Reproduce:

1. Staff logs in
2. Navigates to order queue
3. Look for search bar

Expected Result: Search bar allows finding orders by unique order number.

Actual Result: No search functionality. Staff must scroll through all orders to find a specific order.

Bug Report INC-ORD-008: No Order History for Customers

Incident ID	INC-ORD-008
Test Case IDs	TC-ORD-023, TC-ORD-024
Date Found	31 May 2026
Tester	Ashhal Aamir
Module	Online Ordering
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: Customers cannot view their order history or reorder from past orders. No "Order History" functionality exists.

Steps to Reproduce:

1. Customer logs in
2. Navigate to customer dashboard
3. Look for "Order History" option

Expected Result: All past orders displayed with dates, totals, and statuses. Reorder option available.

Actual Result: No Order History functionality. Past orders cannot be viewed or reordered.

3 Login, Event & Admin Module Bugs

Bug Report INC-LGN-001: Staff Credentials Not Found / Role Merged

Incident ID	INC-LGN-001
Test Case ID	TC-LGN-004
Date Found	31 May 2026
Tester	Muhammad Ibrahim
Module	Authentication
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: Staff role is merged with admin role. No way to create or login as a separate staff user with limited permissions.

Steps to Reproduce:

1. Try to register as staff
2. Try to login with staff credentials

Expected Result: Separate staff role with approval queue and order management (not full admin privileges).

Actual Result: Staff credentials not found in documentation. Staff role merged with admin. Only admin role exists.

Bug Report INC-LGN-002: Customer Can Access Admin URL

Incident ID	INC-LGN-002
Test Case ID	TC-LGN-007
Date Found	31 May 2026
Tester	Muhammad Ibrahim
Module	Security / Role-Based Access
Severity	Critical
Priority	High
Status	Open (No fix available from developers)

Description: Customer can access admin dashboard URL directly and gain full admin controls. This is a critical security vulnerability.

Steps to Reproduce:

1. Log in as regular customer
2. Manually type admin dashboard URL (e.g., /admin/dashboard)
3. Access page

Expected Result: Access denied. Redirected to customer dashboard or login page.

Actual Result: Customer gains access to admin controls. Can view and manage orders, reservations, and system settings.

Bug Report INC-EVT-001: Customer Cannot View Event Status

Incident ID	INC-EVT-001
Test Case ID	TC-EVT-001
Date Found	30 May 2026
Tester	Muhammad Ibrahim
Module	Event Booking
Severity	Major
Priority	Medium
Status	Open (No fix available from developers)

Description: After submitting an event booking request, customers cannot check the status (Pending/Approved/Rejected) from their dashboard.

Steps to Reproduce:

1. Log in as customer
2. Submit event booking request
3. Try to check status

Expected Result: Customer can see booking status = "Pending Approval"

Actual Result: Only admin can view event status. Customer has no visibility after submission.

Bug Report INC-EVT-002: No Capacity Validation for Event Bookings

Incident ID	INC-EVT-002
Test Case ID	TC-EVT-007
Date Found	31 May 2026
Tester	Muhammad Ibrahim
Module	Event Booking
Severity	Major
Priority	Medium
Status	Open (No fix available from developers)

Description: System does not validate that guest count does not exceed event space capacity. Only minimum check (GTE 5) is performed.

Steps to Reproduce:

1. Select event space (max capacity 100)
2. Enter guest count = 150

3. Submit booking

Expected Result: Error: "Guest count exceeds space capacity. Please select a larger space or reduce guests."

Actual Result: No error message. Booking submitted without capacity validation.

Bug Report INC-EVT-003: Customer Not Notified on Event Approval/Rejection

Incident ID	INC-EVT-003
Test Case IDs	TC-EVT-010, TC-EVT-011
Date Found	31 May 2026
Tester	Muhammad Ibrahim
Module	Event Booking
Severity	Major
Priority	Medium
Status	Open (No fix available from developers)

Description: When staff approves or rejects an event booking, the customer does not receive any notification (email or in-app).

Steps to Reproduce:

1. Customer submits event booking
2. Staff approves or rejects the booking
3. Check if customer receives notification

Expected Result: Customer receives notification of approval/rejection with reason (if rejected).

Actual Result: No notification sent. Customer has no way of knowing status change.

Bug Report INC-ADM-001: No Menu Management Functionality

Incident ID	INC-ADM-001
Test Case IDs	TC-ADM-004, TC-ADM-005, TC-ADM-006, TC-ADM-007
Date Found	31 May 2026
Tester	Muhammad Ibrahim
Module	Admin Dashboard
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: Admin cannot create, edit, delete menu items or categories. No menu management directory exists.

Steps to Reproduce:

1. Log in as admin
2. Navigate to menu management
3. Try to add/edit/delete menu items

Expected Result: Admin can create, edit, delete menu items and categories.

Actual Result: No menu management functionality exists. Menu appears to be static/pre-set with no admin controls.

Bug Report INC-ADM-002: No Table/Event Space Configuration

Incident ID	INC-ADM-002
Test Case IDs	TC-ADM-008, TC-ADM-009
Date Found	31 May 2026
Tester	Muhammad Ibrahim
Module	Admin Dashboard
Severity	Major
Priority	High
Status	Open (No fix available from developers)

Description: Admin cannot configure table capacities or event space capacities. No configuration directory exists.

Steps to Reproduce:

1. Log in as admin

2. Navigate to table/event space configuration
3. Try to change capacities

Expected Result: Admin can update table and event space capacities.

Actual Result: No configuration functionality exists. Capacities appear to be hard-coded.

Bug Report INC-ADM-003: Admin Cannot Explicitly Create Staff Accounts

Incident ID	INC-ADM-003
Test Case ID	TC-ADM-010
Date Found	31 May 2026
Tester	Muhammad Ibrahim
Module	Admin Dashboard
Severity	Major
Priority	Medium
Status	Open (No fix available from developers)

Description: Admin cannot explicitly create staff accounts from the interface. Users must be created first, then converted to admin role.

Steps to Reproduce:

1. Log in as admin
2. Navigate to user management
3. Try to create a new staff account

Expected Result: Staff account created with temporary password. New staff can login with limited permissions.

Actual Result: No direct "Create Staff" option. User must already exist before being converted to another admin.

4 Summary of Bugs

Module	Number of Bugs	Critical/Severe
Reservation Module	8	5
Ordering Module	8	4
Login/Event/Admin Module	8	5
Total	24	14

Key Findings:

- **Critical Security Issue:** Customer can access admin dashboard via direct URL (INC-LGN-002)
- **Major Missing Features:** No menu management, no order history, no reservation approval workflow
- **Authentication Issues:** No session timeout, account lock not working
- **Staff/Admin Role Confusion:** Staff and admin roles merged in final product
- **Notification Gaps:** No email notifications for event approvals/rejections
